

# WATER QUALITY TRAINING

## **Do your site personnel take water samples for Environmental Authority compliance?**

Water quality samples must be collected by an "Appropriately Qualified Person" in order to meet legislative requirements.

4T Consultants has developed an accredited Certificate III Unit of Competency in Water Quality Monitoring course, covering the collection and analysis of water quality samples. The course enables participants to collect and analyse water samples correctly.

*Site Managers can be confident that the samples collected will be in accordance with the Queensland Department of Environment and Heritage Protection Guidelines.*

During training, participants will learn how to sample in accordance with the Queensland Monitoring and Sampling Manual 2009 v2 (DEHP).

Training can be conducted on your own site.

Training Delivered In Association With
