- Land-fill & Waste Management
- WHS Obligations

03

## Course Objectives

There are many issues that MUST be integrated into everyday tasks - not just know about them.

- Waste Types
- Management Approaches
- Hazards & Risks
- Obligations - Issues - Penalties

4t

## Course Registrations

We deliver 'Face-to-face' or online - your choice + courses can be specifically tailored to suit your requirements and/or organisation.

## Awareness

Do operators have the tools and skills to implement your waste strategy?

Do your operators understand the legislation and their obligations?

Do your operators have the experience and knowledge required to meet Workplace Health & Safety (WHS) and Environmental **Obligations**.

Our short course provides the under-pinning knowledge required for all front-line workers in the landfill and waste management industries to:

- understand the foundation principles of waste management;
- meet WHS obligations and remain safe at work;
- understand what obligations are under applicable legislation;

## Understanding

Designed to help your Operators & Supervisors :

- understand waste types and preferred management approach;
- realise the risks inherent in waste management;
- address site specific and surrounding social & environmental considerations;
- understand your obligations under WHS legislation;
- govern environmental issues, employees should be aware of.
- know the penalties and consequences for legislative non-compliance.

# purpose

4t Consultants

Changing the way we look at Environmental Management

## 4t

### Our Purpose

Our purpose is achieving sustainability of our natural resources - meeting man-kind's needs without compromising the ability of future generations to meet their own needs.

But Earth's resources are finite. We must use them responsibly and sustainably.

We support the managers of our natural resources who are responsible for sustainability: Miners, Farmers, Government Utilities and Business Owners. In order to achieve this we use our Assets: Equipment, Training & Mentorship, and Quality Systems.

4t Consultants Pty Ltd

## GOOD SCIENCE

4t Consultants recognise that, in order to exist on our planet, we have to utilise the resources around us, our:

SOIL

AIR

WATER

MINERALS.

We also recognise that we must share these resources with our children and future generations.

Our mission is to help our clients to obtain economic production from our natural resources with good stewardship, and with the least environmental disruption, manageable.

Our part is to provide the managers of those resources with accurate and reliable data and information, by always working to the highest standards of scientific and ethical integrity.

Only data and information of this quality will allow those managers to make production and planning decisions with confidence.

Everything we deliver to our clients must be:

- . Accurate
- . Reliable
- . Replicable.

This is the focus of our work and the commitment we bring to those who work with us.

Changing the way we look at Environmental Management.
