

Measure | Monitor | Manage

Field Officer

4t Consultants | Environmental

Position Description

Environmental Field Officer

About You

If you have had experience dealing with mining companies, you will edge up towards the top of the queue. A lot of our work is on mine sites, so we have to deal with the officialism.

In a nutshell, you will be in the field, collecting environmental sample - surface (dams, rivers) water and groundwater (bore water), drinking water, dust, soil, noise etc. Then, you will pack those samples and send them off for analysis. You will also be responsible for recording data about those samples.

About Us

We're 4T Consultants – a tight-knit team of scientists, consultants and down-to-earth people who care deeply about what we do. We've built a strong reputation for quality and integrity, particularly in groundwater and surface water monitoring, land use planning, and environmental compliance.

We believe in values-based, purpose-led work. We've even written our own Culture Book to keep ourselves accountable.

Your Role

We are looking for an Environmental Field Officer to join us.

Full time or part time – our main task is to find the right person.

Why join us?

We are a small team, so you won't be just a number.

We are making a difference. We are an environmental services company, and we work to help our clients do their work with the least environmental disruption possible.

We're not here to just do a job.

We are family friendly. We know a lot of workplaces say that, but we really are.

(Ask one of our current team).

We are driven by our values - that we have all agreed upon. We even have a "Culture Book" that describes what we believe, the contribution we make, how we work, and the values we follow.

We believe in continual skills and personal growth.

Everyone is encouraged to keep learning, so further education is a part of the deal.

We believe that hard work and a bit of fun belong together.

As a Topgrading company, our hiring processes are unusually thorough.

But that ensures we have a team of A Players, 100% jerk-free, who will help you learn, grow, and expand your personal horizons.

We are looking forward to hearing from you.

purpose

4t Consultants

Changing the way we look at Environmental Management

The Ideal Candidate

This is what we are looking for in our ideal team member:

A desire to grow and learn

Experience in extended outdoor work.

We work on a lot of mine sites, so experience doing that will be handy.

WHS Focus - Ability to recognise, manage and follow workplace health and safety directions.

Fit for work and able to carry 25kg eskies.

Practical engineering mindset will be very helpful.

Ability to be mobile, as some projects will require overnight stays of up to a week.

Computer skills:

Basic Office 365 suite minimum, and Microsoft Operating System, as well as iPhones and iPads.

Database software principles (helpful, but not essential)

Unrestricted working rights in Australia

Drivers Licence (P plates ok).

A good sense of humour

If you have had enough of being a cog in the wheel of a big business and being treated like a cog instead of a person, this position is worth considering.

What you bring

Essential Qualifications

This list is not exhaustive, but these are the main things you will be doing.

Conduct field tasks and record field observations in accordance with 4T procedures.

Operate and maintain field testing equipment to Australian and EPA Standards.

Communicate effectively with landholders, site managers, staff and stakeholders.

Secure and manage samples in accordance with 4T procedures and standards.

Organise work plans to achieve project goals and timelines in association with the Operations Manager.

Comply with any site-specific standards for projects.

Carry out maintenance tasks on equipment
Maintain computer records relating to field data.

Check data prepared by other senior staff members, and support the other field team members in their work.

Leave work areas tidy after use.

Contribute to the achievement of the company's mission and goals.

Contribute to the development of company Policies and Procedures

Live our company culture
